

Validation and future rankings of all saved candidates

SORT scores divided by each phase's own F0 score · all 10 candidates in every cell · lower is better

✱ F0 ● OFF_LORA ■ H_FULL ▲ H_MLP

V: full-validation LoRA choice · LOW: fixed lowest LoRA LR · marker size increases with LR rank within family; identical points may overlap

Exploratory reuse of two sources in two time blocks; one stored optimizer seed (12000), not four independent sources.
 Selections use original V only. C13 / E83 origins use H48 at a daily stride. QCAL uses C only and gives no coverage guarantee.
 CIs condition on saved checkpoints and fixed selectors. Hindsight oracle regret is descriptive and cannot be used for deployment.
